### 1920's Sensory Gallery Walk

During the 1920s, a glance down Main Street in most American towns revealed a sight that was new in the United States: cars. For the first time, many Americans could afford to buy an automobile. Cars moved faster than the horse-drawn buggies they replaced. In fact, just about everything was moving faster, from assembly lines to music and dancing. Values were changing rapidly, too. Many people were eager for a little fun, and “modern women” stepped out of their traditional roles. This exciting decade became known as the Roaring Twenties.
